PARTNER EVALUATION MATRIX

White-Label Engineering Partner Evaluation Matrix

A 25-point evaluation framework for agency directors and CTOs evaluating third-party development providers. Use this rubric to assess legal protection, code quality, staging security, and capacity scalability.

Evaluation Criteria	Verification Requirement	Score (1-5)
1. NDA & Legal Protection	Bilateral NDA with strict non-solicitation clauses and total code IP assignment to agency.	[ ] / 5
2. Staging Security	Password-protected staging containers with verified HTTP noindex response headers.	[ ] / 5
3. Capacity Reliability	Dedicated 160h/mo pod model eliminating freelancer bench abandonment risks.	[ ] / 5
4. Technical QA Process	Automated pre-flight testing covering Liquid debt, INP metrics, and schema validity.	[ ] / 5
5. White-Label Isolation	Zero public attribution; invisible integration into agency Slack and project software.	[ ] / 5
